PROJECTS

PERSONAL PORTFOLIO

Explore my personal portfolio website, thoughtfully designed and developed with cutting-edge web technologies. This dynamic site is powered by HTML5 for structure, CSS for styling finesse, and jQuery for enhanced interactivity. Dive into my skills and projects through a seamless and engaging user experience!

Vision AI

Developed Vision AI, a natural language processing application using React.js, MongoDB, Node.js, and the OpenAI API. The project features four key modules: text-to-speech, speech-to-text, an AI chatbot with capabilities similar to ChatGPT, and a text-to-image generator. The application integrates advanced AI models to provide seamless conversational experiences and image generation based on user input. The use of modern web technologies ensures efficient performance and responsiveness, making Vision AI a versatile tool for AI-driven interactions.

ZAPCHAT WEB APP

Developed ZapChat, a real-time web chat application using React, Material-UI, Node.js, MongoDB, and Socket.io. The app provides seamless communication and an intuitive user interface for enhanced messaging experiences.

EDUCATION

➤ Ganpat University

Bachelor of Computer Application
CGPA : 9.30 SGPA : 10
2021-2024

➤ J.M.Chaudhari Sarvajani Vidyalaya

Senior Secondary School
Percentage: 63%
2019

Higher Secondary School
Percentage: 63%
2019-2021

Award :

➤ Student of the Year, Ganpat University

Awarded for exceptional academic performance, leadership, and contributions to the university community during the academic year 2023-24.

Languages :

- Html5
- Css3
- Javascript
